

## Accessibility Door Opening Systems

### Need

The existing main entry doors at the BLM's Alaska Fire Service do not have accessibility features. Doorways will be modified to allow the installation of an automatic door opening system that will comply with Americans with Disabilities Act of 1990 requirements. Two additional entries require openers.

### Recovery Act Funding

Three doorways will be modified by local contractors in late 2009 using stimulus funds.

### Benefits

The new door opening systems will improve employee and visitor accessibility and safety.
