

## Tangle Lakes Campground Entrance Road Repair

### Need

The Tangle Lakes Campground entrance road accesses camping and boating facilities within the Delta National Wild, Scenic River corridor. The current road is in need of resurfacing, and drainage improvement along the entire 2800-foot stretch and widening of two 500-foot sections.

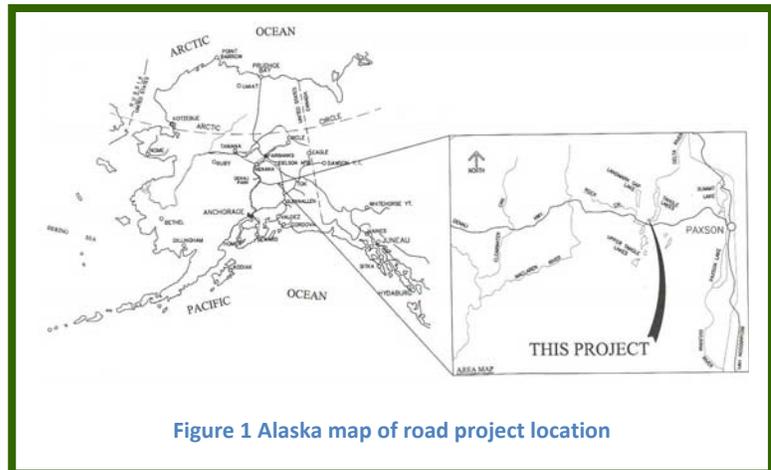

Figure 1 Alaska map of road project location

### Recovery Act Funding

Funds will be used for a contractor to complete road design and reconstruction in 2010.

### Benefits

The project will provide a safer, two-lane travel route for visitors; reducing the chance of head-on encounters along the curve in the road. Improving drainage will help decrease maintenance by reducing surface erosion. This project helps ensure public health, safety, and improves the condition of recreational access to these BLM facilities.
