## Taylor Highway Campgrounds Water System Upgrades

### Need

Two new water systems will be installed at BLM campgrounds on the Taylor Highway. A new water well will be drilled to replace the poorly insulated, frozen well at the Walker Fork campground at Milepost 82. A new well will be installed and plastic storage tanks will be replaced by stainless steel storage tanks at the West Fork campground at Milepost 49.

### Recovery Act Funding

The water system upgrades will be completed under contract during the summer of 2010.

### Benefits

Potable water will be made available to the recreating public using these BLM campgrounds. This project demonstrates BLM-Alaska's commitment to public health, safety and the environment.
